

Cambium Learning Technologies® (CLT) Web Licensing

Overview

CLT Web Licensing offers convenient license check in/out through secure Web services for accessing Kurzweil Educational Systems™, IntelliTools™ and other Cambium Learning Technologies products.

The Web Licensing product package includes this guide, the product CDs along with two additional CDs: the Web License Administrator program and the Web License Client program. The Administrator program allows you to manage licenses and users, while the Client program allows users to access Cambium Learning Technologies products such as Kurzweil 3000™ and Classroom Suite™ from the Web.

Both programs require Internet access.

General Steps

Step 1: Call Customer Service

Before you can use CLT Web Licensing, your organization's site and product information must have already been set up by Cambium Learning Technologies. Customer Site Administrator(s) and users may have already been set up as well.

You will need Customer Service to provide you with your organization's site name, user name and password. Call: 800-894-5374 (U.S. and Canada) or 781-276-0600.

Step 2: Install the Web License Administrator Program

Any user with Administrator privilege can install the Administrator program. See *Installing the Web License Administrator Program* on page 1. After this program is installed, the site administrator or teacher with Administrator privilege can log in any time to manage users and licenses. See the section, *Managing Users and Licenses* beginning on page 4.

Step 3: Install the Client Program on Each Machine

Any user with Administrator privilege can install the Client program. See *Distributing and Installing the Web License Client* on page 2. Once this program is installed, product users/students can log in and use the Cambium Learning Technologies product associated with their user name.

Installing the Web License Administrator Program

Insert the Web License Administrator CD, then find and click the **WebLicAdmin.exe** file.

- If you are using a .net 2.0 system, the program automatically installs. If not, follow the prompts.
- For easy access, the program creates a desktop shortcut.

Distributing and Installing the Web License Client

Once you have set up users, you or another designated person can install the desired CLT product using the Web License Client program. If you plan on having others install the product, provide them with the Client CD along with their individual user names and passwords. The Client program should be installed on each client computer.

If you are an IT professional you can use the MSI install to install the Client program for Kurzweil 3000 from a central location.

Installing the Web License Edition on the Client

1. Have the site name handy.
2. Ensure Internet access.
3. Remove any existing versions of the product.
4. Insert the CD with the Web License Client program.
5. Click the **setup.exe** file.
6. The Install program begins; follow the prompts.
7. Enter the site name.
8. **Finish** the install and **Restart**. The product icon appears on the desktop.

Each user logs into the product with the unique user name and password that you provide. Users may not change the user name and password.

Installing the Web License Client Using the MSI Install (for IT Specialists):

This option installs the Web License Client computers across your LAN from a central location. It is provided for network administrators who are knowledgeable about MSI packages and have the necessary tools to operate directly on an MSI package.

Microsoft .Net Framework 2.0 must already be installed before using MSI. Windows 2000 additionally requires Windows Installer 3.1 already installed.

You will need to:

- 1) Use the reduced UI option.
- 2) Specify the following arguments as properties to the **Kurzweil 3000 v.11.msi** package:
AUTO= **1** (should be a numeric value)
SITE= (e.g., mysitename) (this is the site name assigned by CLT)
- 3) (Optional) By default, the client user will need to enter logon information when launching Kurzweil 3000. You have the option, however, to create a multi-login account and save the information during the MSI install so the user won't be prompted again. To do so, enter the following additional arguments as properties to the MSI:
USER= (e.g., myusername)
PASSWORD= (e.g., mypwd)

MSI Install Notes:

You must set up the account in the Site Administrator program and mark it as a Multi-Login account.

Examples to deploy the MSI through command line:

```
msiexec.exe/i "Kurzweil 3000 v.11.msi" AUTO=1 SITE="mysitename" /qr  
msiexec.exe/i "Kurzweil 3000 v.11.msi" AUTO=1 SITE="mysitename2"  
USER="myusername" PASSWORD="mypwd" /qr
```

Managing Users and Licenses

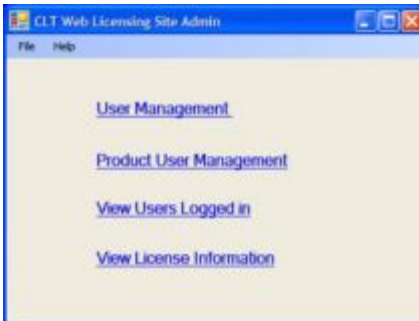

Logging in to the Web License Server and Opening the Main CLT Web License Administrator Screen

Double-click the Web License Administrator desktop shortcut.

Log in: enter your **Site Name**, **User Name** and **Password**.

The main **CLT Web License Admin** screen appears.

From this screen, you can go to:

- The **User Management** screen to add, edit and deactivate users.
- The **Product User Management** screen to associate users with products.
- The **View Users Logged In** screen for real-time information about users who are currently logged onto the system.
- The **View License Information** screen for an overview of the total number of concurrent user licenses for each product you have purchased.

As you work in the screens, you may encounter an exclamation point, , indicating that there is a message, usually notifying you that some required information is missing. To see the message, hover your cursor on the exclamation point.

To save and exit screens:

After you have entered data or edited a management screen, you can click:

Done to save the data and exit.

Cancel to not save your changes and exit.

To exit the **View** screens or the main **Admin** screen, use the **Close** button.

Adding a New User to or Editing User Information

1. From the main **Admin** screen, click **User Management**.

The **Site User Management** screen appears.

The screenshot shows the 'Site User Management' window. At the top, there is a 'Select a user' dropdown menu with 'adeline' selected, and 'Done' and 'Cancel' buttons. Below this is a table with the following columns: Username, Password, Type, FirstName, LastName, Multi Logins, Logins/Allowed, and Active. The table contains 14 rows of user data.

Username	Password	Type	FirstName	LastName	Multi Logins	Logins/Allowed	Active
adeline	adeline	admin	adeline	adeline	<input type="checkbox"/>	1	<input checked="" type="checkbox"/>
ball	ball	user			<input type="checkbox"/>	1	<input checked="" type="checkbox"/>
Silly	Silly	user			<input type="checkbox"/>	1	<input checked="" type="checkbox"/>
home	123	user	Home	user	<input type="checkbox"/>	1	<input checked="" type="checkbox"/>
jennifer	jennifer	admin	jennifer	edgesavage	<input checked="" type="checkbox"/>	25	<input checked="" type="checkbox"/>
K3SQA	sqa	admin	SQA	Gene	<input type="checkbox"/>	1	<input checked="" type="checkbox"/>
KJUser	password	user			<input checked="" type="checkbox"/>	5	<input checked="" type="checkbox"/>
Mario	Mario	admin			<input checked="" type="checkbox"/>	10	<input checked="" type="checkbox"/>
mario1	123456	user	mario	ball	<input checked="" type="checkbox"/>	5	<input checked="" type="checkbox"/>
roger	roger	user	roger	roger	<input checked="" type="checkbox"/>	2	<input checked="" type="checkbox"/>
sara	sara	admin	sara	fulpert	<input checked="" type="checkbox"/>	25	<input checked="" type="checkbox"/>
saratost	12345	user			<input type="checkbox"/>	1	<input checked="" type="checkbox"/>
SQAmb	sqa	admin	QA	Gene	<input type="checkbox"/>	4	<input checked="" type="checkbox"/>
SubeUser	1	user			<input checked="" type="checkbox"/>	3	<input checked="" type="checkbox"/>

2. Do one of the following:

To add a new user, either click the **Plus** sign button along the top or click in an empty user field.

To edit user information, either select the user from the **Select a user** list or scroll through and click in the desired row.

3. From the user **Type** list for the selected user, assign **User** or **Administrator** privilege.
4. Enter or edit the following:

FirstName

LastName

UserName (Required Entry)

Password (Required Entry)

5. By default all newly added users are set to the **Active** state. If you no longer need a user's information, uncheck the **Active** checkbox.
6. Click **Done** to save your edits and exit the screen.

Adding and Viewing Product User Information

User information must be in the database, to add a user, see “Adding a New User to or Editing User Information.”

1. From the main **Admin** screen, click **Product User Management**.

The **Product User Management** screen appears.

User	Login Count	Login Duration	Active
Main	0	0	<input checked="" type="checkbox"/>
SubUser	7	25	<input checked="" type="checkbox"/>
ball	2	1	<input checked="" type="checkbox"/>
jennifer	0	0	<input checked="" type="checkbox"/>
susanne	0	0	<input checked="" type="checkbox"/>
saratest	0	0	<input checked="" type="checkbox"/>
main1	0	0	<input checked="" type="checkbox"/>
adeline	0	0	<input checked="" type="checkbox"/>

2. Select a product from the **Select a Product** list.

The table shows the users who have permission to use the selected product.

Login Count – indicates how many times the user logged into the selected product.

Login Duration – indicates how much time, in minutes, each user spent working with the selected product.

3. **To add a user for the selected product**, do one of the following:

Click the **Plus** sign button along the top.

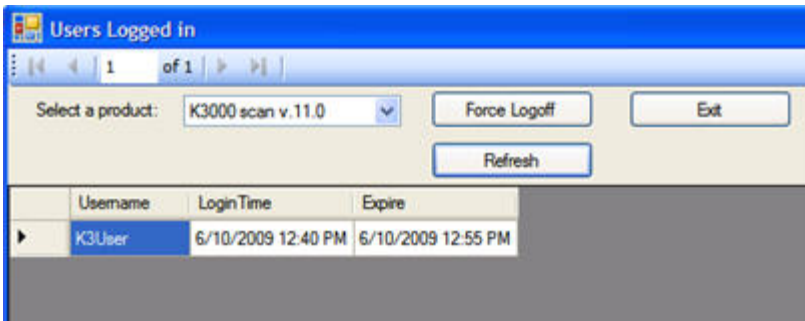

Or click in an empty user field and use the **User** dropdown list to select the desired user.

4. By default all newly added licenses are in the **Active** state. If you no longer need a set of licenses, uncheck the **Active** checkbox.
5. Click **Done** to save your edits and exit the screen.

Viewing User Logged In and License Information

From the main **CLT Web License Admin** screen, do one of the following:

Click **View Users Logged In** to see users currently logged into a selected product.

To force a user off, click the **Force Logoff** button.

To update the information, click the **Refresh**.

Click **View License Information** to see the versions, number of and start and expiration dates of licenses in your organizations.
